

## **THE WHOLE WORLD IN ONE VISION - Russia Pavilion & Conference 2015**

**10 February 2015, Moscow**

Organized by BusinessMediaRussia Ltd. and powered by Messe Stuttgart GmbH, the unique machine vision exhibition will take place in Moscow 17-18 June, 2015. Machine vision already strengthened its position as a must-have technology at European manufactures within over the 25 years of successful developing.

From barcode identification to recognition of faces – machine vision applications are widely used in various spheres such as pharmaceutical, automotive industries; retail; transport and many others. The possibilities of application of machine vision are so diverse that there are virtually no limits to the areas for use.

Within the frameworks of the exhibition all visitors will get a unique chance to experience complex machine vision applications presented alive. Come and see individual and tailor-made solutions that economize time and costs!

VISION Pavilion & Conference will allow the domestic industries to find and accommodate new breakthrough solutions for industrial and non-industrial applications.

VISION Russia Pavilion & Conference 2015 will be co-located with the leading forum and exhibition of technology, materials and equipment for the semiconductor and microelectronics industry – SEMICON Russia 2015.

Mark your calendar and plan now to visit our trade fair!
