A Joint Venture of **UTC Aerospace systems** and **JSC NPO "Nauka"**

## **HAMILTON STANDARD – NAUKA 20 YEARS OF SUCCESS ON INTERNATIONAL AND DOMESTIC MARKETS**

In November of this year JSC "Hamilton Standard – Nauka," a leading Russian manufacturer of heat exchangers for air conditioning systems of civil aircraft, celebrates its 20th anniversary.

The idea to establish a joint venture between JSC NPO "Nauka" and Hamilton Standard came about in 1994 and resulted in a company backed by the capabilities of the parent companies in the manufacture of air conditioning systems heat exchangers for the aerospace industry.

The early years of operation proved that Hamilton Standard – Nauka's development required entry in to the international market. The company successfully met that challenge: today Hamilton Standard – Nauka supplies its products to the world's major aircraft manufacturers and MRO providers.

Higher production volumes for major international programs such as Boeing 787 and Airbus 380 and the growing demand of the Russian aircraft industry called for expansion of capacity. A new production facility was built in Kimry (Tver Region) in 2011. It is fully compliant with international energy efficiency standards (LEED), has state-of-the-art equipment and relies on lean manufacturing methods. As a result, the company production output has increased multifold. Twenty years of hard work has ensured Hamilton Standard – Nauka as a leader among global centers of heat exchanger design and production.

Today Hamilton Standard – Nauka parent companies, UTC Aerospace Systems and JSC NPO "Nauka," consider further development of the joint venture to include a wider product range of air conditioning components and stronger presence on MRO market.

*JSC "Hamilton Standard - Nauka" is a joint venture of JSC NPO "Nauka" and UTC Aerospace Systems (a unit of United Technologies Corp., USA) established in Moscow in 1994. JSC "Hamilton Standard - Nauka" designs and develops heat exchangers for air conditioning systems of civil aircraft. Hamilton Standard – Nauka customers include the world's leading aircraft manufacturers - Boeing, Airbus, Embraer, Bombardier and Tupolev.*

*UTC Aerospace Systems designs, manufactures and services integrated systems and components for the aerospace and defense industries. UTC Aerospace Systems supports a global customer base with significant worldwide manufacturing and customer service facilities.*

*United Technologies Corp., based in Hartford, Connecticut, provides high technology products and services to the building and aerospace industries.*

*JSC NPO "Nauka" is a leading producer of systems and components for aircraft air conditioning, life support and pressure control systems in the Russian Federation and for international space programs.*
