Language: **ENGLISH and RUSSIAN**

April 10th, 2014
15:00 – 17:00
AEB Conference
Centre UI.
Krasnoproletarskaya
16, bld.3, entrance
8, floor 4, office 8,
Moscow

AEB Open Event organized by the Energy Efficiency Committee

ENERGY EFFICIENCY SPEED DATING

The Energy Efficiency Speed Dating event is offering you 10 mn individual face to face meeting with the following energy efficient solutions' providers:

Baker & McKenzie

Our Russian Climate Change and Energy Efficiency Practice was one of the first of its kind to be established and is now one of the most dynamically growing practices in the field of climate change and energy efficiency in Russia and the CIS. We are advising major foreign companies and Russian and foreign regulators on various climate change and energy efficiency matters (including Kyoto Protocol-related issues). We have unique experience in the review of contractual structures related to the development of Kyoto Protocol-related projects (including JI projects) and projects involving voluntary emission reductions in Russia. Our lawyers were involved in drafting the existing legislation on energy efficiency.

BASF

BASF is the worldwide chemical company producing a range of energy efficient materials for all major sectors of economy: construction (both industrial and residential), pipelines etc.

Bayer AG

EcoCommercial Building program – an intelligent concept with competences and solutions in: 1) Building envelope: Façade, roof, walls, floor, glazing, sealing technologies. 2) HVAC: Heating and cooling technology, ventilation and air-conditioning, sanitary engineering, lighting engineering, building automation, fire prevention technology. 3) Energy efficiency and sustainability: Energy modeling, reduction in fossil fuels, intelligent ventilation and air-conditioning technology, effective lighting concepts. 4) Comfort and design: Floor coatings, noise protection, partitions. 5) Construction: Building construction

BSH Bosch und Siemens Hausgeräte GmbH

BSH Group as leading home appliance manufacturer in Europe has focus on development and production of super-efficient products to decrease electricity and water consumption. With BSH brands Bosch, Siemens, Neff consumers enjoy high value products of high performance and low life cycle costs. BSH products achieve outstanding

energy saving results by using modern technologies such as heat pump tumble dryers, dish washers with Zeolite™Drying system, Compressor Technology™ vacuum cleaners, EcoSilence Drive™ washing machines, Low Frost refrigerators and Flexinduction hobs.

CMS Russia

CMS can offer creative solutions on corporate, tax, customs and contractual structuring for ESCO/EPC projects to attract financing and secure both ESCOs, banks and clients (public and private)' interest. We have practical experience of working with both public and private actors of the EE market (real estate, transport and industrial sectors).

ECOTEAM

ECOTEAM works in the field of legal EHS (Environment, Health, and Safety) and legal energy efficiency consulting. We provide legal support of planning and ongoing activities in compliance with Russian EHS and energy efficiency legislation.

FENICE RUS

Through energy service contract FENICE RUS provides tailored energy efficiency solutions to industrial clients operating in various industries. The application of such contract allows the industrial partners of FENICE RUS to obtain saving from the modernization of their equipment without investing own resources and to improve the reliability of energy supply.

GDF SUEZ

Energy Services Business Line offers solutions for efficient and green energy to its industrial, tertiary and public authority clients. These proposals range from the conception of technical facilities to its construction, and even beyond its completion with long-term management of performance contracts. The Group has a great expertise in electrical and HVAC engineering, industrial maintenance, utilities management, design and installation of equipment (boilers, co/trigeneration plant, and alternative energy plants), lighting and power-distribution networks and management of heating systems on hot/cold networks to meet all the needs of its customers.

GDF SUEZ is present in Russia through two subsidiaries of Cofely and LLC "Ecoservices", a JV between Cofely (GDF SUEZ) and Gazprom, which propose also analytical and research services in the field of power efficient technologies, energy performance certificates of buildings, buildings for class certification by Leed or Bream technology and thermal imaging studies.

Legrand

Legrand is the global leader of electrical and digital building infrastructure, providing cost effective solutions to increase Energy Efficiency into industrial, commercial and residential buildings.

Legrand is active in Russia for more than 20 years operating with 20 commercial offices, one local central stock and two industrial units.

Lindab Buildings

Lindab Buildings (part of Swedish Lindab Group) is the leading European manufacturer of complete steel building solutions. The company has resulted of successful merging of Astron Buildings and Butler Manufacturing Europe, with clean strong record of over 50.000 buildings supplied and built in the last 50 years of history.

Pre-engineered tailor-made building systems for production and warehouse facilities, office and hotels, sports and leisure are designed and produced at our factory in Yaroslavl since 2009. We guarantee high quality and speed - wherever you are building.

Local production in Yaroslavl gives to investors the benefit of work with one international company for realization of multiple projects across Russia and CIS.

Sustainable building solutions to work and live in across Europe, Russia & CIS

Philips Lighting

Philips Lighting is one of the world leaders in this industry offering energy efficient lighting solutions for different segments. We have proven track of projects with energy saving up to 78% in Retail, Industry, Sport Segments and working with largest Russian customers: X5 retail Group, Magnit, NLMK, Olimpstroy, etc.

Saint Gobain

The world leader in the habitat and construction markets, designs, manufactures and distributes building materials, providing innovative solutions to meet growing demand in emerging economies, for energy efficiency and for environmental protection. We are constantly innovating to make homes more comfortable, cost-efficient and sustainable worldwide. Saint-Gobain solutions span from self-cleaning windows and photovoltaic glass to smart insulation systems, water supply systems, solar solutions and building materials distribution. As one of the top 100 industrial groups in the world, Saint-Gobain continues to deploy its technological know-how, 20% of Saint-Gobain products did not exist five years ago.

Schneider Electric

Schneider Electric is a global, innovative and responsible company; helping people make the most of their energy.... Between energy generation and its usage, Schneider Electric provides technology and integrated solutions to optimise energy usage in markets like energy & infrastructure, industry, data centres, buildings and residential. With a unique portfolio in electrical distribution, industrial automation, critical power & cooling, building management and security, Schneider Electric is the only global specialist in energy management and a world leader in energy efficiency.

Schneider Electric is active in Russia for more than 30 years operating with 20 branches , 4 Plants , 3 logistic Centers and One R&D Center covering all Russia
