

TMF Group launches Capital Markets Services

03 July 2018

It follows the successful renaming of the company's Structured Finance Services business.

TMF Group, a leading provider of high value business services to clients operating and investing globally, has renamed its Structured Finance Services business, today officially launching Capital Markets Services.

TMF Group has been providing services to the capital markets industry – under the Structured Finance Services banner – for many years, initially supporting securitization. However, the name no longer did justice to the broad cross section of capital markets activities that TMF Group now supports. While the Group clearly has a strong presence and market share in the securitization space, its service offering is in reality much broader and touches on:

- the loan market
- project finance
- aircraft finance
- Islamic finance
- the corporate bond market and provision of products like Escrow.

With the launch of its' Capital Markets Services business, TMF Group is offering a clearer, more concise view of where it can add value to clients.

Paul Wilden, Global Head Capital Markets Services, commented: “This change allows us to communicate our commitment to the broader capital markets in a clear and simple way. We continue our emphasis on structured finance and welcome the new, enhanced focus on infrastructure and project finance, aircraft finance, direct lending and loan servicing.”

Bruno Bagnouls, Global Head of Capital Markets Services and PERE, added: “The launch of Capital Markets Services marks another important step in TMF Group’s journey to expand our expertise and offering in the capital markets sector. We now have a clear and well understood brand that will facilitate easier conversations with market players.”
