NOYTECH Supply Chain Solutions Launches Postal Express Freight Service on Vladivostok–Moscow Rail Corridor

Moscow, Russia, 2025 – NOYTECH Supply Chain Solutions proudly announces the launch of Postal Express, an expedited rail freight service utilizing postal railway wagons along the Vladivostok–Moscow route. Delivering faster, more reliable solution, it reduces transit time to 12 days and expands the portfolio of services for the final stage of the import logistics chain – a key element for inbound cargo from China and Southeast Asia to Russia.

Conventional container transport on this route is often hampered by infrastructure limitations, including a shortage of fitting platforms and reliance on open-top wagons, which can lead to prolonged delivery times. Delays of 15 to 30 days before dispatch are not uncommon, and en-route congestion further exacerbates transit times due to limited traction resources and overloaded stations.

Postal Express addresses these challenges by leveraging dedicated postal railcars, ensuring fixed daily departures with no idle time or operational delays.

Cargo is securely transported in covered railcars, protecting shipments from adverse weather conditions throughout the journey. The service includes the flexibility of intermediate unloading at ten designated stations en-route, allowing regional cargo to be efficiently detached while the rest of the train continues uninterrupted to Moscow. Upon arrival, freight is received at a covered Russian Post terminal, where NOYTECH coordinates final-mile delivery directly to the consignee's warehouse – delivering a seamless, end-to-end logistics solution.

“There is strong and growing demand for shipments on this corridor, but infrastructure bottlenecks continue to hinder efficiency,” said Perry Neumann, Shareholders’ Representative of NOYTECH Supply Chain Solutions, moovie Holding UAE. “With Postal Express, we provide our clients with a scheduled, accelerated service that overcomes these obstacles. We are confident this offering will be well-received and become a vital component of our logistics portfolio.”

About NOYTECH Supply Chain Solutions

NOYTECH

NOYTECH Supply Chain Solutions comprises 28 locations and warehouses in 8 countries: Russia, Saudi Arabia, UAE, China, Azerbaijan, Uzbekistan, Belarus and Kazakhstan. NOYTECH's professional team contains more than 1.500 employees. The warehouse area operated comprises 72.000 m2. The product portfolio covers sea, road, rail and air transportation, project (heavy lifts / over-dimensional cargo), supply chain management (4PL) and consultancy services, exhibitions/events, contract logistics, insurance and customs clearance, as well as commodity trading (sourcing / technical import / distribution) and industrial services (engineering). The organization is operating globally via a trustworthy partner network.
