

IWM's customized, client-oriented approach, the professional nature of our services, our wide network of trusted agents and competitive rates have made us into a specialist company that is respected and trusted. The demand-driven creation of new offices throughout Russia has meant we are able to offer a localized service over the whole the country. We are the right move for you!

Transporting the contents of your flat or house from one location to another within the same country or area equates to just the same amount of care involved in an international move. We go that extra bit, to make sure that your personal items, however fragile they may be, arrive in the same condition as they were when they were packed. A special marking system is used for all our moves to ensure that each item ends up where it should be. Items which were on your desk, for example, will end on your desk and not on your bed.

What our clients say

...even
punctual!

...you did a
great job!

...till
next time

...a big thank
you from Heira

...

!

are they
only in
Russia?
