

Moscow, February 8, 2010

PRESS RELEASE

Sales of new cars and light commercial vehicles in Russia continue to decrease

- *Sales of new passenger cars and LCVs in Russia decreased by 37% in January 2010*
- *Among the top 10 bestselling models of January 2010, nine are locally produced*

January 2010 saw sales of new cars and light commercial vehicles in Russia decrease by **37%** compared with the same period in 2009, or by 43,938 less sold units, according to the AEB Automobile Manufacturers Committee (AEB AMC).

Among the **top ten bestselling models** of passenger cars so far, **nine** are produced in Russia.

“Although the market fell by 37% compared to last January, the decline was a slight improvement in the December 2008 fall of 38% compared to the previous year. January 2008 did however have significant distortions caused by a declining currency and varying stock levels across the industry. This can also be seen by the wide variations of year on year performance between different brands. Combined with a short trading month, valid year on year comparisons can only be made towards the end of quarter one”, commented David THOMAS, AEB Automobile Manufacturers Committee’s Chairman.

Martin JAHN, Vice Chairman of the AEB Automobile Manufacturers Committee continues, “January sales are traditionally weak. The reason for that is a long holiday period and decrease in consumer activity. We expect revival in the market already in February.”
