

## Press-release

10 October 2016

### September car market decrease is 10,9 %

- Sales of new passenger cars and LCVs in Russia decreased by **10,9%** in **September 2016**
- Among the top ten bestselling models so far, nine models are locally produced

In **September 2016**, sales of new cars and light commercial vehicles in Russia decreased by **10,9%** compared to **September 2015** or by 15 375 sold units, and amounted to **125 568** cars, according to the AEB Automobile Manufacturers Committee (AEB AMC).

This year in January—September **1 020 932** cars were sold.

**Joerg Schreiber**, Chairman of the **AEB Automobile Manufacturers Committee** commented:

“With nine months of the year completed, the market has finally crossed the 1 million threshold. This is maybe not quite what we had hoped for at this point, but more than some pessimists had predicted for the whole year. Pace of sales in the remaining months of the year will depend on whether customers believe that state-sponsored purchase incentives like trade-in will run out soon or not: Those who see a deadline looming may want to accelerate their purchase decision. And if this is the thinking of the majority, new car demand will go up in the short term”.
