# Efficient office space replanning

How space planning is normally done.

Different types of works done by people require different type of w/s:

UK Example

There are solutions for 12, 10, 8 and 6 sq.m. per person.

Calculations

Conclusion

# You can sit like this $\ensuremath{\textcircled{}}$

#### How space planning is usually done?

When we start planning your new office we analyze your existing office divided into four areas

- premises
- technology
- organisation
- individuals

#### Our tasks today

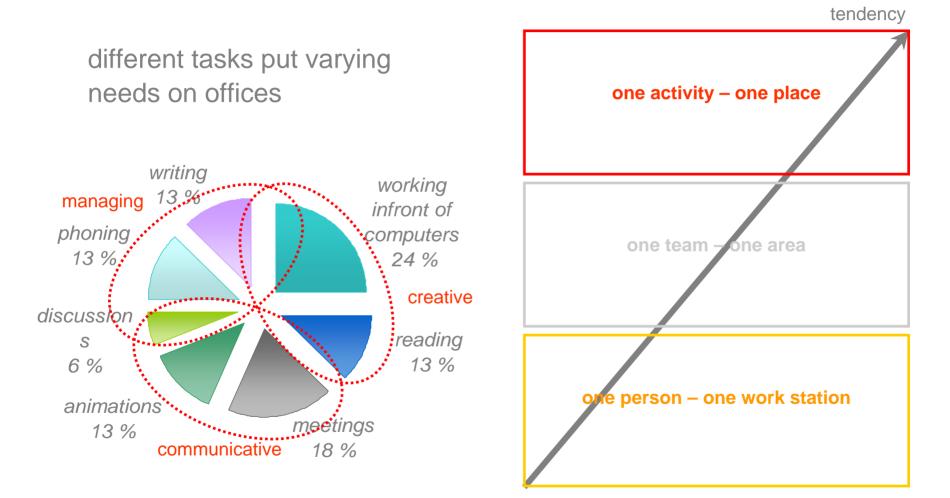

# Individuals

#### our tasks today

- creative
- managing
- communicative

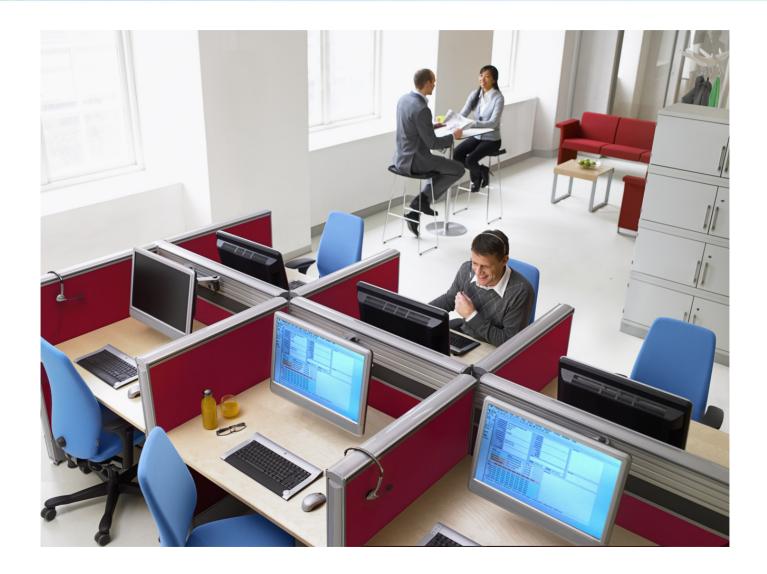

#### Touch down center

# Call center

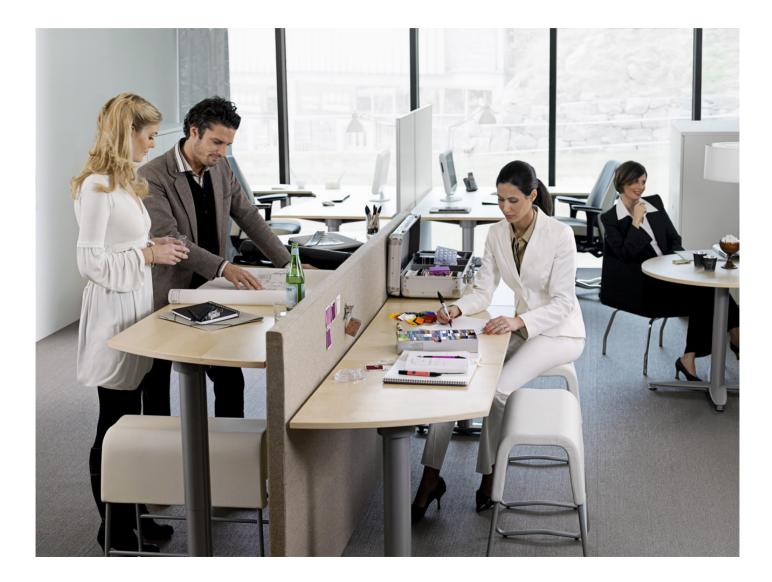

# Informal meeting area

# Quick meetings

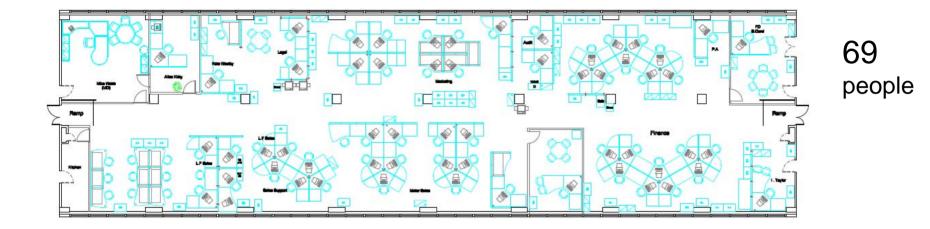

# Smart planning will bring efficiences

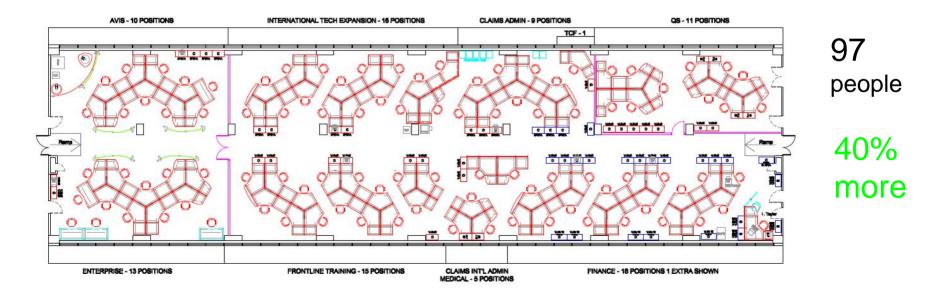

# Would you like to save some space?

# Compact planning possibilities

# Planning can be even more compact

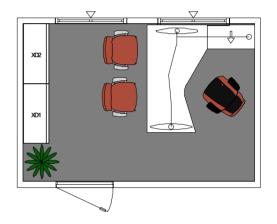

There are solutions for 12, 10, 8 and 6 sq.m. per person

# Decide, how spacios your business allows you to sit

# Example of 12 sq.m. per one person

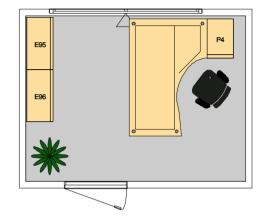

# Example of 10 sq.m. per one person

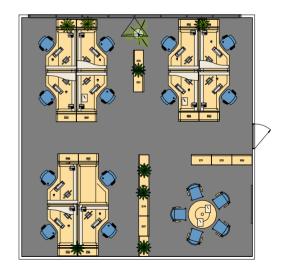

# Example of 8 sq.m. per one person

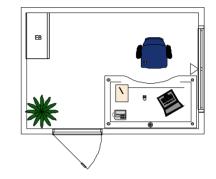

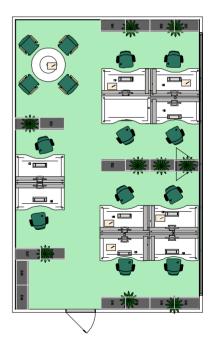

# Example of 6 sq.m. per one person

Manager room

# Example of room 18 sq.m. per one person

Manager room

# Example of room 14 sq.m. per one person

# What can be done to save space?

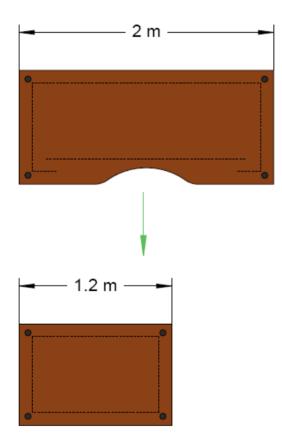

#### Rooms redistribution between departments

# What can be done to save space?

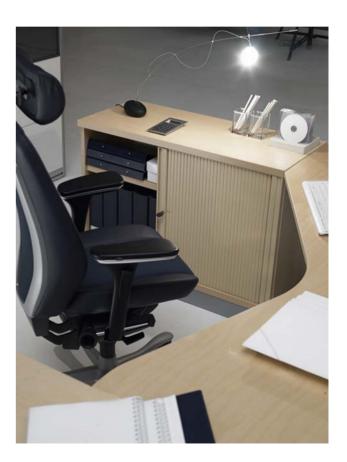

Change tables to smaller sized

Use high cabinets near walls

Cabinets with table height

What can be done to save space?

#### Combine meeting and training room

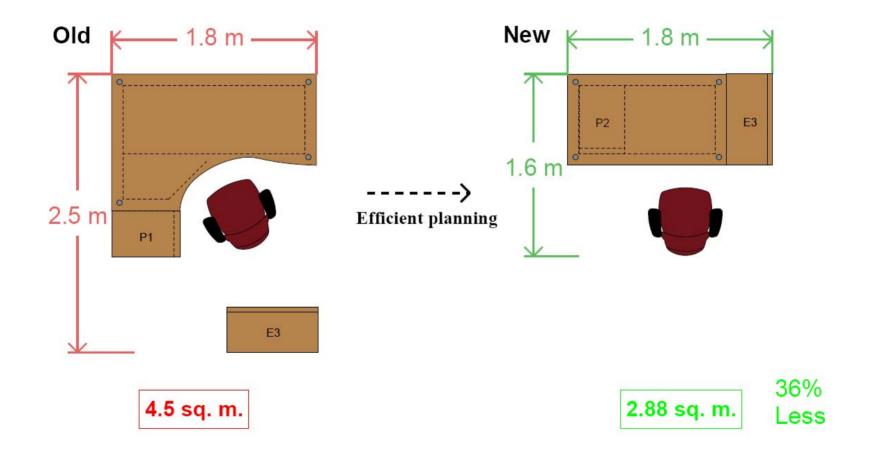

Think how many visitors chairs you need

# Calculations of saving the space

#### •Refuse from your additional office (if any)

# •Sublet some part of your current office

#### •Look for a smaller space

\*If you take another office, new furniture would be reasonable:

- Not to pay money for transporting old furniture
- Compensate employee's disappointment from moving
- Modern efficient workplaces save space
- Increase productivity of personnel
