NOYTECH Supply Chain Solutions Launches Nationwide Groupage Delivery Service for Small and Medium-Sized Businesses

Moscow, Russia, XX February 2026 – NOYTECH Supply Chain Solutions announces the launch of a nationwide groupage delivery service designed to support small and medium-sized businesses across Russia. The new offering provides efficient, door-to-door transportation for small consignments, enabling marketplace sellers, local manufacturers, and independent retailers to access professional logistics solutions without the need for complex operational preparation.

The service has been developed in response to the continued expansion of Russia's e-commerce sector and the increasing demand for flexible, scalable supply chain solutions. Leveraging NOYTECH's international logistics expertise and extensive domestic transportation network, the company delivers a high-quality service standard adapted to the specific needs of dynamic and growing businesses.

The groupage solution covers shipments from 10 to 600 kilograms, with cargo dimensions of up to 2.4 meters in length. By consolidating shipments within its nationwide network and partner infrastructure, NOYTECH ensures consistent service quality and predictable transit times across all regions of Russia. Clients benefit from the ability to ship smaller volumes without waiting to accumulate full truckloads, allowing them to optimize inventory turnover while maintaining cost transparency.

The service operates in a fully integrated door-to-door format and is supported by NOYTECH's proprietary transport coordination processes. Customers can calculate shipping costs in advance using the online calculator available on the company's website and submit shipping requests directly through the digital interface. Each request is assigned to a dedicated transportation coordinator who oversees the shipment from initial parameter verification to final document return, ensuring a personalized and reliable service experience.

Perry Neumann, Founder of NOYTECH Supply Chain Solutions and moovie Holding UAE, stated: "The rapid development of e-commerce continues to create new opportunities for regional producers and entrepreneurs across Russia. We observe strong growth dynamics in this segment nationwide and remain committed to expanding our service portfolio accordingly. The launch of our groupage delivery solution represents a logical extension of our integrated logistics offering and reflects our strategic objective to make high-quality, international-standard logistics accessible to businesses of all sizes."

With this new service, NOYTECH Supply Chain Solutions further strengthens its position as a comprehensive logistics partner, supporting businesses throughout their growth lifecycle and contributing to the efficiency and resilience of modern supply chains.

About NOYTECH Supply Chain Solutions

NOYTECH

NOYTECH Supply Chain Solutions is an international logistics and supply chain management group operating worldwide through a trusted global partner network, while maintaining its own subsidiaries in eight countries: Russia, the United Arab Emirates, Saudi Arabia, China, Belarus, Kazakhstan, Uzbekistan, and Azerbaijan.

The Group operates 27 offices and logistics facilities and manages more than 54,000 square meters of warehouse space. Its professional team comprises more than 1,200 employees delivering integrated, end-to-end supply chain solutions across international and regional trade corridors.

NOYTECH's service portfolio includes multimodal transportation (sea, road, rail, and air), project logistics (heavy lift and oversized cargo), 4PL supply chain management, contract logistics, customs clearance, cargo insurance, exhibitions and event logistics, as well as commodity trading solutions such as sourcing, technical import, and distribution. The company also provides industrial and engineering services supporting complex infrastructure and industrial projects.

By combining local presence with global reach, NOYTECH delivers reliable, scalable, and compliant logistics solutions tailored to dynamic and evolving market environments.
