

8<sup>th</sup> June, 2012  
Moscow

## **PRESS RELEASE**

### *The Year Continues Strong for New Cars and Light Commercial Vehicles in Russia*

- *Sales of new passenger cars and LCVs in Russia increased by 11% in May, 2012*
- *Among the top ten bestselling models so far, ten are locally produced*

According to the AEB Automobile Manufacturers Committee (AEB AMC), **May, 2012** saw the sales of new cars and light commercial vehicles in Russia increase by **11%** in comparison to the same period in 2011. This May, 260,944 units were sold; this is 25,486 units more than in May, 2011.

From January to May, 2012 the percentage sales of new cars and light commercial vehicles in Russia increased by **15%** in comparison to the same period in 2011 or by 151,946 more sold units.

**Joerg Schreiber**, Chairman of the **AEB Automobile Manufacturers Committee** commented:

May marked the 25<sup>th</sup> month of consecutive year on year growth for the Russian automotive market. The pace of growth is becoming less pronounced, reflecting the robust volume base the market reached last year with the help of the now absent government stimuli to the retail sector. Present momentum therefore can be described as healthy, and consistent with earlier expectations. External developments on a global economic scale and their potential impact on the appetite of Russian consumers is something to be watched in the coming months. At this point however, we see no reason to revise the positive outlook on the Russian automotive market, maintaining a full year forecast of 2.85 mils passenger and light commercial vehicles in 2102.
